

FLEXIROAM

Product Manager

About Flexiroam:

We empower our product squads to solve hard problems – customer problems and business problems – in ways that our customers love, yet work for our business. Our product squads are cross-functional and durable, generally composed of a product manager, a product designer, and several engineers.

We staff our product squads with the skills necessary to come up with effective solutions that are valuable (our customers choose to buy or use), viable (the solution works within the many constraints of the business), usable (the user can figure out how to use) and feasible (our engineers have the skills and technology to implement).

While the product designer is accountable for ensuring the solution is usable, and the engineers are accountable for ensuring the solution is feasible, the product manager is accountable for ensuring the solution is both valuable and viable.

About the role:

As a Product Manager, you will be the definition of all Flexiroam products. You will work integrally with our product squads, business stakeholders and partners to craft amazing product experiences to delight our customers.

What you'll be doing:

- Managing the backlog & roadmaps for our products from start to final delivery
- Translate business requirements, clients requests into product-specific items that are easily testable by cross-functional product squads
- Work with all business stakeholders and the engineering teams to determine the scope and schedule for releases
- Qualitative research and quantitative analysis to inform crucial product decisions
- Proactively collaborate with different teams to provide product vision, direction, and priorities
- Owning and driving projects from ideation through implementation and launch, focusing on excellent execution
- Evangelize solutions with customers, prospects, partners as well as internal groups
- Drive alignment across teams and communicate status and progress

Necessary Qualifications:

- 3+ years of software product management experience
- Demonstrated understanding of the techniques and methods of modern product discovery and product delivery.
- Demonstrated ability to learn multiple functional areas of business – engineering, design, finance, sales, or marketing.
- Demonstrated ability to figure out solutions to hard problems with many constraints, using sound judgement to assess risks, and to lay out your argument in a well-structured, data-informed, written narrative.
- Able to demonstrate data-driven decision making and tradeoffs for product and strategic decision making.
- Self-motivated and team-oriented. able to work both autonomously and effectively as part of a geographically dispersed team.

FLEXIROAM

Diverse perspectives:

We know that innovation thrives on product teams where diverse points of view come together to solve hard problems in ways that are just now possible. As such, we explicitly seek people that bring diverse life experiences, diverse educational backgrounds, diverse cultures, and diverse work experiences. Please be prepared to share with us how your perspective will bring something unique and valuable to our product teams.
